

To support our team we are looking for an Intern in Automation (f/m)

Climeworks has developed the world's first commercial direct air capture technology that removes CO₂ from air. Our plants capture atmospheric CO₂ to supply to customers, or to safely and permanently store underground. With the world's largest team of over 60 experts in atmospheric CO₂ capture, Climeworks has positioned itself as a global pioneer and trendsetter in this new industry. Our focus lies on three markets: food, beverage & agriculture; renewable, CO₂-neutral fuels & materials; and the permanent reduction of CO₂ from the atmosphere.

We are a young, dynamic and international team whose goal it is to fight climate change with a sustainable, economically viable solution. We are looking for individuals who are determined and passionate about our purpose, think disruptively and produce the highest quality work. Our vision is to capture 1% of global emissions by 2025. Want to help us achieve that?

Your responsibilities

- You work independently on work packages in the Development department, with a focus on plant automation and process control.
- Together with the controls & electric team you design, implement and test the control systems for our pilot and customer plants.
- You support the service team during commissioning of the plants.
- You work on the optimization of control concepts in pilot and research plants and conduct the necessary changes in the hardware as well as in the software.
- You make adaptations to the control systems of test systems and production facilities.

Your profile

- You have a bachelor's or master's degree in mechatronics, mechanical engineering, or electrical engineering (or equivalent).
- You are available for a 6-month internship starting on June or July 2019
- You have sound knowledge of programming in one or multiple high-level languages and ideally in PLC programming.
- You are able to read and understand functional descriptions and other technical documentation in German.
- You are creative, reliable, willing to perform and have a structured working style.
- You are capable of working in a fast-paced team environment, as well as independently.

Are you interested? Then please fill in the online application form and upload your complete dossier to our careers portal: www.climeworks.com/careers. Feel free to give us a call on +41 44 533 29 99 if you have any questions.
