

Are you ready to push a social impact business?

Who we are

We are Project Circleg – a Zurich based start-up that develops an affordable prosthetic leg system designed for the needs and circumstances of amputees in developing countries. Our vision is based on the circular economy and by using recycled plastic waste in combination with simple production methods, the Circleg prosthesis can be produced locally and cost-effectively.

Who we are looking for

We are looking for a business developer who would like to take on responsibility and get involved in a start-up. You would be in charge of developing further our business model, creating and implementing a financing strategy and building and maintaining new partnerships. If you have experience in this area and feel addressed, we would be very happy to get to know you.
